

Intrinsically Safe (IS) Emergency Lighting for Zone 0 environments, especially useful during power outages for improved work safety and emergency illumination for personnel movement.

Nautitech® CUBEx IS Lights are powered by an uninterruptible power supply (UPS) that provides more than 5 hours of emergency lighting when you need it most.

Useful Applications

- ✓ Around the BSL during services moves and cable retractions when power is off
- ✓ Illumination at the Tail Gate during gas trips
- ✓ Visibility of the cable area around tethered equipment when replacing damaged cables
- ✓ Area lighting around DCBs, conveyor drives, and switchgear
- ✓ Emergency evacuation lighting for second egress routes
- ✓ Supplementary work lights on RTVs etc.

CUBEx IS Emergency Lights powered by UPS

- Illumination when you need it most - **when there is NO power!**
- High efficiency, long life, bright light
- Various beam angles available
- Cables and plugs feed into existing power supplies
- No FLP enclosure required
- 3 x independent lighting circuits
- Cool running
- IP 67 connector
- Rated from 10.5-20V DC - suitable for 12V applications
- Operating conditions -20°C to +60°C
